ZYVARON

AUTONOMOUS CYBERSECURITY

Detect. Block. Recover. Automatically.

While you sleep, ZYVARON is fighting for your computer.

SEED ROUND | 2026 | CONFIDENTIAL

Defend Everything. Recover Anything.

THE PROBLEM

Cyber threats are constant. Defence isn't.

Ransomware

Spreads through open ports and unpatched software. Encrypts everything. Demands payment.

$4.5M

avg cost per attack (2024)

Open Attack Ports

Port 445 (SMB) and 3389 (RDP) sit wide open on most machines. Hackers know this.

200K+

computers hit by WannaCry

CVE Vulnerabilities

Every app you use has known security holes. Most users never patch them.

29,000+

new CVEs published in 2024

THE SOLUTION

Meet ZYVARON.

Your computer's invisible, tireless bodyguard.

01
DETECT

10,000 ports + every file scanned every 60 seconds

02
BLOCK

Dangerous ports slammed shut via Windows Firewall in <4s

03
RECOVER

Deleted files restored from secure vault in ~30 seconds

04
REPORT

Live dashboard shows every action, alert and CVE in real time

PRODUCT

Real results. First run.

ZYVARON AGENT — LIVE

→ Agent v0.3.0 starting...

✓ 11 files indexed | Snapshot created

→ Port scan: 10,000 ports...

⚠️ CRITICAL: Port 445 (SMB) — EternalBlue!

⚠️ HIGH: Port 3389 (RDP) — brute force risk

→ Creating rule: ZYVARON-BLOCK-SMB-445

✓ Port 445 BLOCKED — rule permanent

→ Creating rule: ZYVARON-BLOCK-RDP-3389

✓ Port 3389 BLOCKED — rule permanent

✓ 2 threats neutralised | 0 active alerts

⚡ Time elapsed: 3.8 seconds

3.8s
PORT → BLOCKED

FILE RECOVERY

FEATURES

Seven layers of protection.

Automatic Port Blocker

Detects & permanently closes 7 dangerous port types via Windows Firewall in <4 seconds

Remediation Engine

Smart / Auto / Manual modes. Switches live in <30s. Handles threats autonomously in AUTO

Filevault & Recovery

Every file snapshotted every 5 min. SHA-256 verified restore to exact original path

Live Security Dashboard

7-page real-time browser dashboard. Alerts, Vault, Ports, CVEs, Devices — all in one place

CVE Scanner

Checks all installed apps against NIST NVD. Shows exact fix command per vulnerability

Threat Radar

Classifies every threat by severity. Smart cooldowns prevent alert fatigue

MARKET OPPORTUNITY

The cybersecurity market is enormous — and growing.

60%	of SMBs lack dedicated security
73%	of attacks target endpoint devices
2.8B+	PCs worldwide — all vulnerable
17%	CAGR — market growth rate

BUSINESS MODEL

SaaS subscription.

Four tiers. Scales with the user.

FREE

$0

forever

- ✓ File monitoring & vault
- ✓ Port scanner
- ✓ Basic dashboard
- ✓ 3 recoveries/day

BASIC

$5

/month · $50/yr

- ✓ All Free features

/month · $140/yr

- ✓ All Premium features
- ✓ Automated pen testing
- ✓ PDF security reports
- ✓ Unlimited devices + API

Download gated behind account · Waitlist of 247+ pre-launch signups · Google Sheets waitlist capturing emails daily

TRACTION

Built. Tested. Real results. Link To Demo

v0.3.0
Live Agent Version

14
CVEs found on first run

10
Critical ports blocked instantly

247+
Pre-launch waitlist signups

Fully Working Product

7-layer autonomous agent running on Windows 11. Port blocking, filevault, CVE scanner, remediation engine, REST API server and live dashboard — all operational.

Real CVE Detection

On a standard developer machine (Chrome, Git, Python), ZYVARON found 3 Critical, 8 High, and 3 Medium CVEs — with exact winget patch commands for each.

Instant Threat Response

Port 445 (the WannaCry ransomware attack vector) detected and permanently blocked in under 4 seconds with zero user interaction.

COMPETITIVE LANDSCAPE

Nothing does all of this.

Competitors solve one problem. ZYVARON solves crucial and vital ones — autonomously.

	Windows Defender	Norton / McAfee	CrowdStrike	ZYVARON
Port blocking (automatic)	✗	✗	Partial	✓
Filevault & recovery	✗	Partial	✗	✓
CVE scanner + fix cmd	✗	✗	✗	✓
Autonomous remediation	✗	✗	Enterprise only	✓
Self-hosted (private)	✓	✗	✗	✓
Price for individuals	Free	$50–100/yr	$150+/yr	**$0–$144/yr**

✓ = ZYVARON handles this automatically · Enterprise solutions cost 10–20× more and require dedicated IT teams

GO-TO-MARKET

Three phases to scale.

PHASE 1 Q3 2026

Launch & Acquire

→ Public launch — Windows desktop

→ Convert 247+ waitlist to users

→ Developer & tech community (Product Hunt, Reddit)

→ Free tier as acquisition engine

→ Target: 5,000 downloads

PHASE 2 Q4 2026

Monetise & Grow

→ Basic + Premium conversion campaigns

→ Referral program (invite 3, get Pro month free)

→ LinkedIn + YouTube content marketing

→ Freelancer & SMB targeting

→ Target: $15K MRR

PHASE 3 2027

Platform & Enterprise

→ macOS + Linux agent release

→ Multi-device team dashboard

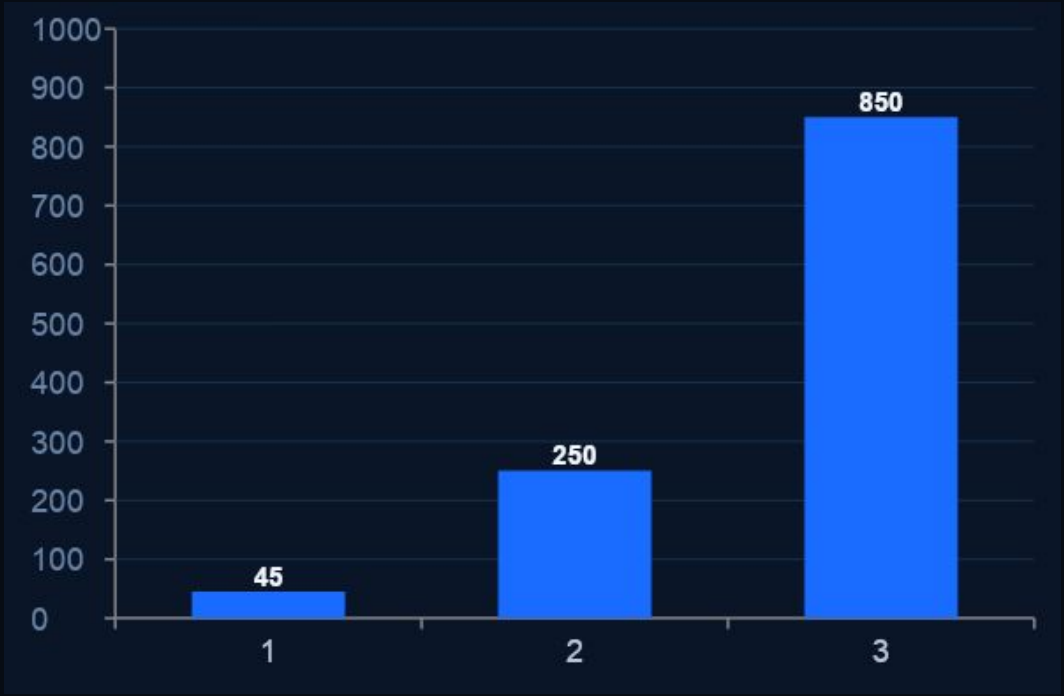
→ Enterprise seat licensing

→ Channel partner programme

→ Target: $250K ARR

FINANCIALS

Lean model. High-margin SaaS.



$45K	Year 1 ARR
$250K	Year 2 ARR
$850K	Year 3 ARR
~82%	Gross Margin
<$4	CAC (organic)
>40×	LTV:CAC ratio

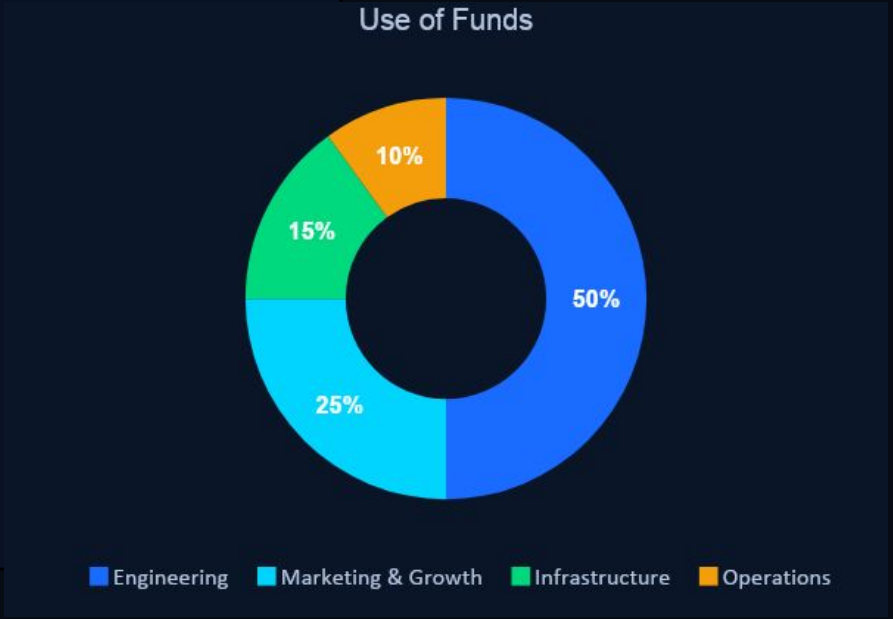
THE ASK

Seed Round

$300,000

SEED INVESTMENT TARGET

Instrument	**SAFE / Convertible Note**
Valuation Cap	**$5M**
Discount	**20%**
Min. Ticket Size	**$25,000**



TEAM

Built by people who understand both security and software.

Daniel Salami

Founder & CEO

Full-Stack Security Engineer

Built ZYVARON from scratch — Python agent, FastAPI server, React dashboard, CVE scanner, and threat remediation engine. Deep expertise in Windows security, network protocols, and autonomous systems.

Python | FastAPI | Windows Security | CVE Research

Abul Dubal Abel

CTO

Senior Security Engineer

Background in enterprise endpoint security, EDR systems, threat intelligence platforms. A Python Developer.

EDR | Threat Intel | Enterprise Security

The future of cybersecurity is autonomous.

ZYVARON is already built, already working, and already protecting real computers today.
